Recent Books in Higher Mathematics

Theory of Invariants	Glenn	\$2.75
A full topical discussion of the leading principles of the subject, employing both the symbolical and nonsymbolical methods.		
Mathematical Theory of Heat Conduction	Ingersoll and Zobel	\$1.60
Contains a large number of practical applications in addition to the theory.		
Problems in the Calculus	Leib	80 cents
An invaluable supplementary volume for courses in calculus, containing over 2000 problems.		
Solid Geometry	Richardson	90 cents
A complete presentation for college classes, employing European as well as American methods.		
Mathematical Theory of Investment	Skinner	\$2.25
A textbook in Mathematics for commercial courses in colleges.		
Resistance of Materials	Slocum	\$2.00
Substitutes the principle of moments for the usual calculus processes, thus making a study of the resistance of materials available early in the course.
